### Microdermabrasion

Deeply exfoliate your skin using clinical grade diamond tips whilst simultaneously vacuuming the skin. Decongest pores and refine your skin, leaving your complexion looking and feeling brighter, smoother and healthier. Microdermabrasion is a no downtime treatment and great for instant skin brightening!

At Blondie Skin, we offer 2 types of Microdermabrasion treatments:

#### Basic

\$80.00

includes double cleansing, microdermabrasion, treatment serums and recovery cream application.

#### Delux

\$110.00

includes double cleansing, microdermabrasion, light peel (if suitable), facial massage using treatment serums and finished with recovery cream application.

\* Add an LED treatment onto this treatment to instantly up your glow and enhance your results for only \$40.

### MPEN micro needling

Single Treatment

\$220.00

3 Pack Series (buy 2 - get 1 free)

\$440.00

MPEN is an advanced micro-needling device, that uses a minimally invasive technique to create thousands of epidermal micro-canals which allow substances to pass through the horny layer of the skin, while simultaneously producing dermoepidermal biostimulation, incrementing the activity of greater penetration of active substances and stimulating collagen remodelling.

During your MPEN treatment, our skin clinicians will infuse ampoules of a cocktail of ingredients specifically tailored to your skin and concern to maximise your treatment results. Followed by a Biocellulose treatment mask to sooth and hydrate your skin.

Benefits:

- Stimulates fibroblasts and the production of elastin and collagen I and III
- Activates the skin repair mechanisms
- Reduces expression lines and pore size
- Reduces the appearance of hypertrophic scars and stretch marks
- Improves skin firmness
- Ampoule infusion can treat a wide variety of skin concerns including pigmentation, scarring, dehydration and more!

At Blondie Skin, we recommend a series of treatments to achieve optimum results for your skin, spaced between 2-6 weeks depending on the depth of treatment.

### Cosmelan®

\$1450.00

A professional de-pigmenting solution to treat even the most stubborn forms of pigmentation including sun-damage and Melasma.

At Blondie Skin our Cosmelan price includes:

- The Cosmelan treatment and application
- 6 Mesoesthetic home-care products, including maintenance cream
- A series of LED healite treatments
- Hydrating/Soothing facial treatment.
- Any follow up consultations

All of what we have bundled together is crucial for obtaining the best results possible and minimizing your downtime. Please note, results and post treatment experiences (downtime) will vary from patient to patient). Below is a general guide of what you may expect to experience during the 2 weeks following your treatment.

**Day 1** - Your treatment is performed in clinic with our Dermal Clinicians. The Cosmelan solution is left on the face for 8-12 hours, depending on recommendation by the skin specialist performing the treatment. During this time you may leave the salon and return home. The Cosmelan mask is a thick paste like consistency. Your skin specialist will advise you on how to safely remove the product and at what time to do this.

**Day 2** - It is expected that you will wake up feeling quite swollen and red. Your skin may feel hot and tight. Today is not the day to go to a special function!

**Day 3** - We advise you to return to the clinic for your 1st follow up. Most patients will begin stage 2 of the Cosmelan treatment at this stage. This is the home care portion of the procedure. Shedding may also begin and skin will still be feeling warm, red and swelling may also still be present.

**Day 4 -7** - Redness will still be present, but will start to reduce to a light pink glow. Heat will also reduce in your skin. Skin will continue to peel and will feel dry.

**Day 7-14** - Skin will begin to look clearer. A red undertone will still be present and skin will still feel dry. Shedding will be almost non-existent. You will continue to use your home-care routine, which includes the Cosmelan maintenance cream, to continue improving results.

Follow up clinical appointments including LED and your Facial appointment will be scheduled during the 2 weeks following your Cosmelan treatment. Thorough home-care guidance will also be provided by your skin specialist.

To book a Cosmelan treatment, we advise an initial consultation with our specialists to discuss further.
